DETAILED ACTION

This Application has been examined. The original claims 1-20 are pending. The examination results are as follows.

Information Disclosure Statement

1. The examiner has considered the document listed in form PTO-1449 submitted with the Information Disclosure Statement (IDS) received 2/18/04 (see the attached form PTO-1449).

Drawings

2. The drawings are objected to because the reference number "202" for the claimed element "a control circuit" recited in each of the independent claims 1, 4, 12, 13 and 20 as defined in lines 25-26 of page 7 of the Specification is not shown in Fig. 2a. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

Art Unit: 2629

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-20 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a rail-to-rail amplifier device for use in a line-inversion LCD gray scale reference generator circuit. Each of the independent claims 1, 4, 12, 13 and 20 requires the uniquely distinct features: "a plurality of amplifiers (204-208), each of said amplifiers comprising: a p-type differential transistor pair (MP1 and MP2) and an n-type differential transistor pair (MN1 and MN2)" and "a control circuit (202) which provides said first and second control signals (220 and 222)" (see figures 2a and 2b); whereas, the closest prior art, the Tsuchi et al. patent (U.S. Patent No. 6,909,414), and the Hsu et al. patent (U.S. Patent No. 6,225,992) disclose conventional LCD gray scale reference generator devices, either singularly or in combination, teach or suggest the above underlined claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They are U.S. Patents Nos.: 6,750,839 issued to Hogan, 6,762,737 and 6,677,923

Art Unit: 2629

issued to Kajihara et al., and 6,963,325 issued to Yano et al., which teach LCD gray scale reference voltage generator systems.
